

The Pig Poop Cycle

POOP MATH:
EACH YEAR 1 SOW HAS 24 PIGLETS
• WHO MAKE 30,000 L OF POOP
• WHICH GROWS 4,700 KG OF CORN
• TO MAKE 117,500 BAGS OF POPCORN
OR FEED FOR 22 PIGS

You buy produce and pork at the grocery store.

Pigs poop. The poop (called manure) goes to storage.

Farmers spread manure on their fields.

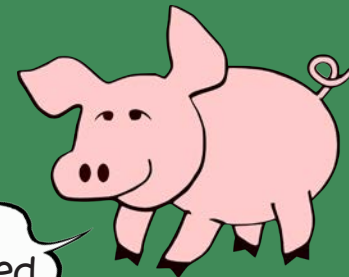

Plants are used for pig's feed.

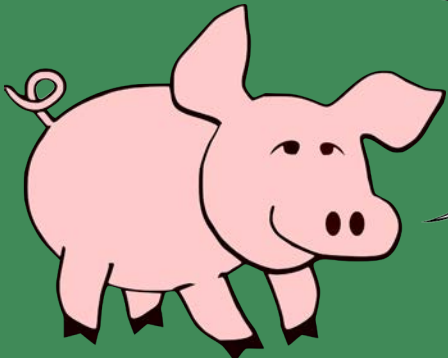

Manure helps plants grow.

I pooped too.

I pooped.

Who am I?

Pop quiz! Test your knowledge of Ontario pigs. Circle one answer from each row. Then have fun colouring!

Storybook pigs live outside. Canadian farmers have learned it's better to keep their pigs in me. **Who am I?**

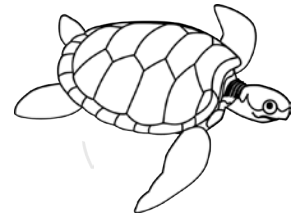

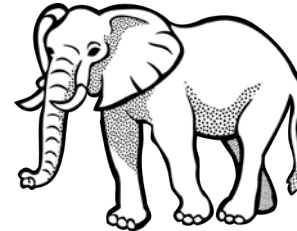

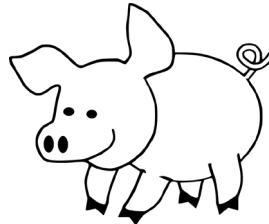

Pigs need to eat a healthy balanced diet. I am something that pigs do NOT eat.

Who am I?

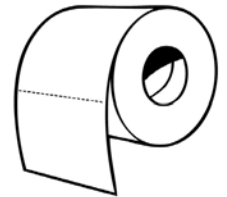

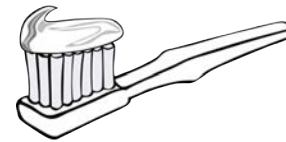

I start out very small, but I like to eat and I grow very quickly. I only weigh 1.5 kg at birth and grow to 130 kg in less than six months.

Who am I?

Pigs produce nutritious meat called pork. Pigs are also used to make other products we use every day. I am something that is NOT made from a pig. **Who am I?**

I am found on the body of a pig. I am used to make artist brushes too. **Who am I?**
