# Important Tips for Livestock Transporters

## Biosecurity Practices in Effect

- **Wear clean boots or boot covers and clean clothes for each load.**
- **Thoroughly clean, disinfect and dry truck and trailer between loads.**
- **Ensure load-out equipment and transfer chutes are clean.**
- **Enter pick-up and drop-off sites through the designated entry points.**
- **Do not enter any restricted access areas without permission.**
- **Follow loading and biosecurity protocols at all facilities. If not posted, ask.**

<sup>1</sup> Porcine Epidemic Diarrhea (PED) is a viral disease causing vomiting, diarrhea, and high death loss in nursing piglets. It transfers quickly among infected pigs but poses no threat to humans.
