

SCHEDULE A

FEED EFFICIENCY

Feeder Pigs

Feed conversion rate
Currently..... _____
With research..... _____

Growing/Finishing Pigs

Feed conversion rate
Currently..... _____
With research..... _____

Target population: Percentage of pigs that could be affected by the
Research (%)..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
adoption..... _____

HOGS PER SOW PER YEAR

Feeder Pigs

Average number of piglets per litter
Currently..... _____
With research..... _____

Average number of litters per year
Currently..... _____
With research..... _____

Target population: Percentage of sows that could be affected by the
research (%)..... _____

Sow feed required (kg)
Currently..... _____
With research..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
adoption..... _____

SCHEDULE B

PRODUCT QUALITY

For Research Designed to Reduce Undesirable Characteristics

Percentage of hogs receiving discount (%)..... _____

Price discount (%)

 Currently..... _____

 With successful research..... _____

Target population: Percentage of pigs that could be affected by the
research (%)..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
adoption..... _____

For Research Designed to Create Premium Characteristics

Price of Market hog

 Currently..... _____

 With successful research..... _____

Target population: Percentage of pigs that could be affected by the
research (%)..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
adoption..... _____

HEALTH

Percentage of hogs that die as a result of disease

 Currently..... _____

 With research..... _____

Average age at which mortality occurs (days)..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
adoption..... _____

SCHEDULE C

MARKETING AND ECONOMICS

Increased prices

 Currently..... _____

 With research..... _____

Target population: Percentage of pigs that could be affected by the
 research (%)..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
 adoption..... _____

Marketing hogs (\$/pig)

 Currently..... _____

 With research..... _____

Average number of litters per year

 Currently..... _____

 With research..... _____

Target population: Percentage of pigs that could be affected by the
 research (%)..... _____

Probability of research success (%)..... _____

Length of time in years from the beginning of research until initial
 adoption..... _____
